SUMMARY

Full-stack Software Development Engineer with 2.8 years of experience building scalable applications, analytics portals, and AI-powered systems using React, Node.js, Python, and SQL. Hands-on with GIS workflows, CI/CD pipelines, and GCP/Kubernetes operations. Built an end-to-end RAG-based AI agent (CodeLens) independently; completed a Business Analytics and Generative AI certification (BITSoM x Masai, 2026), seeking Analytics or SDE + Analytics hybrid roles.

SKILLS

Data & Analytics:	Data Cleaning, EDA, Descriptive Analytics, Regression Analysis, KPI Tracking, Power BI, Tableau, Excel
Languages & Frameworks:	Python (Pandas, NumPy), SQL, JavaScript (ES6+), TypeScript, React.js, Node.js (Fastify)
AI & Automation	RAG Pipelines, Vector Embeddings, LLM APIs (Groq, Gemini), ChromaDB, Prompt Engineering, GitHub Copilot
Cloud & DevOps	GCP, Kubernetes, Jenkins CI/CD, Rancher, SonarQube, OracleDB, REST APIs, ArcGIS Maps SDK

EDUCATION

B.Tech in Computer Science & Engineering

QIS College of Engineering & Technology, Ongole
2023 · CGPA: 8.36 / 10

WORK EXPERIENCE

Lumen Technologies — Software Development Engineer Sep 2023 – Present

- Built a React-based **Report Portal** integrating 5 Power BI dashboards, enabling administrators to monitor operational KPIs through a centralised interface.
- Contributed to polygon validation and GIS workflows, recovering **12,000+ serviceable units** and enabling an estimated **\$2.7M in potential revenue** through improved address accuracy.
- Migrated **20 legacy SOAP APIs, .NET 4.5.2 to Fastify (Node.js) REST APIs** improving performance and enabling cleaner ArcGIS Maps SDK integration, including GIS features such as real-time coordinate display, scale controls, location previews, and multipart polygon management.
- Improved automated test coverage from **10% to 80%+** across React, Node.js, and Java Springboot services using GitHub Copilot-assisted workflows, reducing regression risk.
- Integrated SonarQube into CI/CD pipelines across 20 repositories, remediating **1200+ code quality issues** and GCP Rancher deployments for 15 services; managed Jenkins contributed to migration of 24 services from on-premise to GCP-hosted Rancher.
- Strengthened platform reliability, security, and code quality by integrating SonarQube quality gates, implementing Kubernetes readiness and liveness probes.

PROJECTS

CodeLens — RAG AI Agent for Codebase Q&A github.com/reeshma13/CodeLens-AIAgent
Node.js, TypeScript, React, Groq (LLaMA-3.3-70B), Gemini Embeddings, ChromaDB, Vite

- Designed and built an end-to-end RAG pipeline (file reader → chunker → Gemini vector embeddings → ChromaDB similarity search → Groq/LLaMA-3.3-70B generation), enabling developers to query any codebase in plain English with citation-backed answers.
- Designed an end-to-end ingestion pipeline using Gemini embeddings and ChromaDB to support semantic code retrieval and context-aware response generation.
- Integrated Groq-hosted LLaMA models to generate citation-backed answers grounded in the indexed codebase.
- Developed a React + Vite chat interface with session persistence, markdown rendering, and source citations to improve code exploration and onboarding.

Sales Analytics System github.com/reeshma13/sales-analytics-system
Python, SQL, Pandas, Power BI, REST APIs

- Built an end-to-end analytics pipeline to ingest, clean, and enrich sales transaction data using Python, SQL, and REST APIs.
- Performed exploratory data analysis and developed Tableau dashboards to track revenue trends, product performance, and key business KPIs.

Retail Forecast & Replenishment github.com/reeshma13/Retail-Forecast-Replenishment
Python, Forecasting, Tableau, EDA

- Developed a demand forecasting and inventory planning workflow using historical retail data to support replenishment decisions.
- Created Tableau dashboards and trend analyses to visualize demand patterns, inventory requirements, and operational insights.

CERTIFICATIONS

Business Analytics with Gen AI and Agentic AI — BITSoM x Masai, 2026 · CGPA: 7.97 / 10
AI Academy Certification (Basic, Intermediate & Advanced) — Lumen Technologies (Internal), 2024

AWARDS & RECOGNITION

Team Star Award — Q3 2025

Manager Recognition — Received 7 recognitions across multiple quarters for contributions to platform modernization, quality improvements, and operational excellence.
